

Room 2 – P3/4

Term 1 August - October 2023

Literacy

In Literacy this term, P3/4 have been learning how to write an imaginative story based on "The Papaya who Spoke". We have learned to retell the story with actions and we have changed it to make our own version of the story.

Numeracy

Primary 3 have been adding and subtracting tens and units using a written calculation.

Primary 4 have been adding and subtracting hundreds, tens and units using a written calculation.

All of P3/4 have also been learning to describe 2D and 3D shapes.

Health and Wellbeing

In P3/4, the children have been learning about the different food groups. This helps them to make healthy choices.

The children have been sorting foods into the different food groups and talking about why this is an important skill.

Learning Across the Curriculum

As part of our Enterprise topic, the children in P3/4 have been learning to organise and run our class library.

The children thought about the skills needed to do different jobs, and they wrote job applications for the role of a Librarian.

The children borrow books, get their library card stamped, and return the books when they are finished with them. As a librarian, the children are responsible for organising and looking after the books in our library.
