

Room 4 - P6/7

Term 1 August - October 2023

Literacy

We have been developing our reading strategies through various text. Predicting what the text will be about, sharing our visualisation of the characters and settings, Metalinguistics, identifying the meaning of new or tricky words as well as summarising the key events, what was relevant and characters and settings.

Numeracy

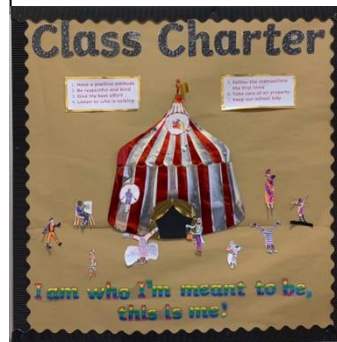

We have been developing our knowledge of decimal fractions and using these to compare numbers and solve problems.

As part of Maths Week Scotland we investigated prime numbers and shared our learning using Picasso themed art.

Health & Wellbeing

Together we created our class charter by discussing our values and rights and agreeing our class expectations. We also listened to and discussed the meaning behind the song 'This Is Me'. Helping us learn to be proud of who we are and know we are all unique.

We have also been reading the book 'The Boy the Mole the Fox and the Horse', discussing the quotes about, friendship, hope, making mistakes and asking for help.

Learning Across the Curriculum

We developed the skills of designing, creativity, problem solving and sharing ideas whilst creating amazing arcade machines.

We enjoyed sharing our learning with the other classes as we invited them to play our arcade games in the community wing.
