

## Room 4 - P6/7

Term 2 October - December 2023

### Literacy

During our Very Important Bear topic we had the opportunity to develop a variety of literacy strategies. We created storyboards, scripts as well as posters advertising our group movie.

As we were working in groups we had to listen to everyone's ideas and opinions as well as being able to voice our own.

### Numeracy

As part of our maths we have been developing our knowledge of the properties of 3D shapes. We have learned to identify shapes by the number of vertices, edges, sides, faces as well as its net.

During outdoor learning we created 3D shapes with pipe cleaners to see if they made the same 3D shape of bubbles.

### Health & Wellbeing

This term for PE we have been developing our skills in badminton and tennis.

We have been learning that fast feet and agility are required, as well as good hand-eye coordination.

We have enjoyed trying out the new hand paddles which have really helped develop our serving skills.

### Learning Across the Curriculum

We had great fun at outdoor learning when we learned that all we need is a tin can and a candle to cook.

We melted some chocolate in a piece of tin foil to dip our marshmallow in.

We still had to follow our fire safety procedures.
