

Room 4 - P6/7

Term 4 April - June 2026

Literacy

We combined a range of skills to design a poster to share information about the World Cup 2026. We researched players, teams, countries, and interesting facts about the World Cup. We demonstrated creativity, teamwork, communication and planning skills.

Numeracy

In Numeracy, we have been developing our knowledge of shapes by exploring the nets of 3D shapes. We have been learning to recognise shapes from their nets, and we have discussed the use of shapes in real life contexts.

We have also been solving equations through our Algebra lessons, and we are becoming more confident using our problem-solving skills in a range of contexts.

Health & Wellbeing

This term we had a visit from a paramedic who brought an ambulance to school to teach us about First Aid. We continued learning about emergency situations in class and we have developed our knowledge of how to respond to a range of emergencies. We learned about water safety, and we know how important it is to keep ourselves and other people safe.

Learning Across the Curriculum

We had a fantastic Leavers' service this term and we put lots of effort and hard work into preparing for our show. We designed stage props and displays and developed our performance skills through acting and singing. The primary 7's also practised their script writing skills and their campfire scene was excellent. We wish the Primary 7's lots of luck as they move on to Larkhall Academy!
