

Literacy

We have completed individual solo talks about Scottish Inventors. We had to research key criteria and present our findings in front of the class using a power point presentation. We received peer feedback and teacher feedback on our presenting skills.

Numeracy

We have been learning to identify and plot co-ordinates in 4 quadrants. We completed some of our work outside, drawing the x-axis and y-axis and plotting co-ordinates.

We have also been developing confidence identifying the missing number in a calculation.

Health & Wellbeing

We have been learning how advertising affects the choices we make and we have focused on making responsible choices. We have learned about Fairtrade and sustainable farming to help us to make informed choices about the food we eat.

In PE we have been developing our defence and attack skills in Hockey.

Learning Across the Curriculum

Our class have been developing a range of skills through a sewing project. We have been learning to complete different types of stitch, attach pieces of fabric together, and make unique and creative designs using a range of materials and colours.
