

## Room 3

Term 1 August - October 2024

### Literacy

We enjoyed reading *George's Marvellous Medicine* as a class and using this for a variety of work. We looked for information in the text and made notes, created character descriptions of *George's Grandma*, made predictions and developed our vocabulary.

### Numeracy & Mathematics

This term we have focussed on number sequences, place value, rounding and 3D shape. We also love using the Chromebook to play games to develop our Numeracy skills.

### Health & Wellbeing

For PE we loved developing our football skills in outdoor PE and volleyball skills in indoor PE.

We have been learning to control the ball in different ways and build skills to work effectively as a team.

### Learning Across The Curriculum

Using our class novel as a stimulus we designed cranes to lift *George's Grandma*. We also used cutting and folding skills to create growing Grandmas!

A highlight was sharing some of this learning with the children in P3/4.
